EDITOR

TO THE

PUBLIC.

Correct Sett of Money Tables ready caft up, is an article in fuch general requeft, that it is quite fuperfluous to enlarge upon its utility here. These Tables now offered to the public, are much more copious than any hitherto published, as they not only proceed by one farthing to two shillings and fixpence, but also from thence to one pound by one penny, which will be found exceedingly convenient to every person in trade, but particularly to fuch as have occasion to deal in Scots money. For example, suppose it required, what is the amount of 100 yards. of cloth at one merk (or 13 s. 4 d. Scots)? Look at page 230 having 138. 4 d. at the top, and you find the amount: to be L. 66 13 4d. which is the answer in Scots money ! to turn which into Sterling, you may either look at the table for that purpole, or take the following short process: in page 80 you have I s. 8 d. at the top, which is one pound Scots, and opposite to N. 66 you have L 5 1000 to which adding 138. 4 d. Scots, or 1 s. 1 d. and a third Sterling, you have the answer in Sterling money, L 5 Las. 1 d. and one third. No pains nor expence have been spared to make this work correct, and the publisher

engages

Money Tables, FIVE SHILLINGS Sterling, in security whereof, he has signed this address with his own hand. And it is to be noticed that no copies are warranted genuine, but such as are signed as under,

Robert Movieon

That these tables may be more particularly adapted to the use of every person in trade, a Table of Expences, Income, or Wages, from one penny to nine pound per day, how much it amounts to per Week, Month, or Year, is subjoined; a complete Sett of Tables for Mechanics, particularly useful to Weavers in warping their webs, shewing the amount of any two numbers multiplied together from 1 to 100; a complete Sett of Interest Tables shewing at one view the interest of any sum from 1 to 100ol. for any number of days at 4, 4 thalf and 5 per cent; a Table of Value of sundry pieces of current foreign money; also, Tables of Commission or Exchange, on Bills; and a complete List of all the Fairs in Scotland. The price of which on fine paper neatly bound is 3 s, and second paper 2 s. 6 d.

TABLES

Trop a b F

SIMPLE INTEREST,

CALCULATED TO A FARTHING.

Shewing at one view, the interest of any sum of money, from 1 l. to 1000 l. for any number of days, at 4, 4 1-half, and 5 per cent. per annum.

When a sum is not immediately in the tables, take the interest of any two numbers that will make up that sum: For example, if you want the interest of 37 l. for 8 days, at 4 per cent. look in the table for 8 days, under column a per cent. the interest of 30 l. is ol. os. 6 d. if. and of 7 l. is ol. os. 1 d. 1 f. which, added together, make ol. os. 7 d. 2 f. the answer.

Explanation of the preceding Tables.

The use of these Tables to tradesmen in general needs not to be mentioned; but they are particularly adapted for Weavers in warping their webs; for example, suppose it required, how many splits are on a web of 75 runners and 15 bonts? turn up to the page having 75 at top, and opposite to 15 in the column, marked the "breadth or things valued" you have the answer 1125 splits. 'Again, suppose you have 39 slips of warp-yarn to be wove in a 35 porter reed, and would know how many ells that will make; look in the table as above, under 70, in the column "breadth, or things valued" for 39, against it in the column "products," you have 2964, being the whole warp-threads, or splitsful, contained in your 39 slips of yarn; look back in the table under 35, your porters filled in the reed for this number, in the column "products," against it you will find 78 ells exactly; and just so with every other different quantity of yarn or reed.
